DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10 and 15-39 drawn to a connecting element for joining two support members.

Group II, claim(s) 11-14, drawn to a method for fitting a support member to a building construction by means of a connecting element.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group II relates to a connecting element comprising a first and second casing body with a through-hole in each casing body for receiving respective support members, which casing bodies can be joined together by way of a joining section at a first end of each casing body, the opposing second end of each casing body being provided with a locking member for holding the support members fast.

Group II relates to a method comprising the steps of:

passing a draw wire through a cable duct together with a connecting element;
connecting a bracing wire to the connecting element coupled to the draw wire;

Art Unit: 3679

passing the bracing wire through the cable duct in the opposite direction by means of the draw wire and the coupled connecting element; and

detaching the connecting element from the bracing wire.

Groups II lacks the special technical features of the connecting element comprising a first and second casing body with a through-hole in each casing body for receiving respective support members, which casing bodies can be joined together by way of a joining section at a first end of each casing body, the opposing second end of each casing body being provided with a locking member for holding the support members fast.

3. A telephone call was made to Stephen L. Grant on September 23, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael P. Ferguson whose telephone number is (703)308-8591. The examiner can normally be reached on M-F (7:30-4:30).
